We are the UK's largest multi-utility solutions provider, with a strong position in international markets. Partnering with blue chip clients such as National Grid, Northern Gas Networks, United Utilities, Eon and Yorkshire Water, we work across the gas, water, wastewater, and electricity industries providing a range of services which contribute to the maintenance and provision of essential utility assets.

We are the largest utility solutions provider on the UK gas distribution network having established long working relationships with National Grid and Northern Gas Networks supporting gas mains network replacement, repair of gas escapes and abandonment programmes.

In the water and electricity industries, they provide the design and build of new distribution and trunk mains, water network rehabilitation, network repair and maintenance, trunk main cleaning and mechanical and electrical maintenance. We also deliver sewer flooding solutions with a range of civil engineering infrastructure solutions for our clients, maintenance and installation of extra high voltage transmission systems as well as providing services to distribution network operators on their medium and low voltage networks, both above and below ground.

The business is underpinned by leading edge technical processes and systems that deliver excellent customer service and permit the provision market leading 24/365 service.

Balfour Beatty provides:

- ❖ Gas meter installation
- ❖ New Connections
- ❖ Mains Diversions
- ❖ Mains reinforcement
- ❖ Increasing capacity through upsizing gas pipes

Work is undertaken in the following areas:

Water, Wastewater, Gas and Electricity works undertaken throughout the UK.
Electricity works carried out overseas.

Website: www.fulcrum.co.uk

Fulcrum is a leading independent UK energy solutions company providing technical engineering, design and project management services across its core gas connections business and, increasingly, as a provider of multi-utility connections. Fulcrum is unique in its market not only for its unrivalled experience but also for its national coverage and ability to deliver design and engineering excellence at a local level.

We operate in the following principal areas:

Unregulated Gas Connections

Fulcrum's core business relates to the design, engineering and management of unregulated connections to the UK gas market. In addition, Fulcrum provides a comprehensive service including disconnections, metering and outlet pipework.

Multi-Utility Connections

Fulcrum also provides multi-utility connections which include a combination of two or more utility supplies, enabling greater efficiency to our customers across both design and project delivery.

Regulated Pipeline Operations

Through its subsidiary Fulcrum Pipelines Limited, Fulcrum owns and operates networks of gas pipelines and their related infrastructure assets.

Our business operates across five customer segments - small and medium enterprises, commercial, small residential, industrial and large residential with customers ranging from gas suppliers to developers and property owners who come direct to Fulcrum. Our ultimate end users include anyone with a premise type across domestic, commercial or industrial.

Fulcrum provides:

- ❖ Gas connections
- ❖ Metering
- ❖ Outlet Pipework
- ❖ Gas Disconnections
- ❖ Multi-Utility
